Project Factsheet for: Innovative Dredging Technology, Peoria Lakes, Illinois

Date Last Updated: 02/12/2007 12:22

Project Location Information

Location: Peoria Lakes portion of the Illinois River

River Basin(s): Illinois

State(s): IL

Congressional District(s): IL-18

Status

Authorized, but not funded. Potential Congressional Add.

Description

The Water Resources Development Act of 1999 Section 503 authorized the review of innovative dredging technologies for potential implementation in the Peoria Lakes, Illinois, area. Potential tasks include reviewing innovative dredging technologies designed to minimize or eliminate contamination of a water column on removal of contaminated sediments and conducting actual tests and demonstration projects using selected technologies. The Illinois River Basin Restoration project of Section 519 of WRDA 2000 also calls for evaluation of sediment removal technology, sediment characterization, sediment transport, and beneficial uses of sediment. There is the potential that some future funding under Section 519 will be directed towards those items.

Summarized Financial Data

Federal Cost	\$2,000,000
Non-Federal Cost	\$0
Total Cost	\$2,000,000
Federal Allocations through FY 2006	\$0
Scheduled Federal Allocation for FY 2007	\$0
Balance to Complete	\$2,000,000

Major Work Item (Next Fiscal Year)

FY 2007 If funds were available, \$500k could be used to initiate a review of innovative dredging technologies for potential implementation in the Peoria Lakes area. Follow-on funding in the amount of \$1,500,000 would be required in future fiscal years to complete the effort and testing.

Authority

SI - Special Interest -- Section 503 of the Water Resources Development Act of 1999
